About This Game

Crystal Cosmos is a side scrolling color-based space shooter. You need to match your ship's color to your enemies color in order to destroy them.

Badges :

However, switching colors opens you up to their attacks, creating a risk versus reward style of game play.

The game takes place in the eight Kingdoms of the Crystal Cosmos, each one is ruled by a different Gem Lord. For eons they have fought each other for supremacy.

You play as Lord Alabastar, ruler of Alabastion, the Kingdom of Light and Order. Your kingdom has been invaded by Obsidious, Lord of Darkness and Chaos. You lose the battle against the invaders. Shattered into nine pieces, the core of Alabastar narrowly escapes.

You must now travel to the eight kingdoms to retrieve the missing pieces. Break down the door of Obsitadel, and exact revenge.

FEATURES :

***Story Mode which has eight different levels, each with it's own unique setting, enemies and boss.**

***Item store where you can purchase upgrades, with shards collected from defeating foes and from completing levels.**

***Dynamic game play - the game keeps track of how well you play and scores you at the end of each level.**

***Stylized Graphics, bringing a unique look to this shooter.**

***Custom Control System & full Gamepad support.**

***Fast intelligent game play, which requires quick thinking.**

***Frantic Boss battles.**

Take on this clever shooter, use your fast reactions and quick thinking progress through the levels. Climbs the ranks and receive your bonus rewards.

Shatter your enemies!

This shoot them up is really beautiful. The game is a question of color. You have to kill the enemies with the right color and the most difficult part, it is when the enemies are a combination of the basic colors... you have to find which colors are right to kill them.

The story? The Universe is in danger, Chaos became stronger and kicked you in the\u2665\u2665\u2665\u2665\u2665 You are playing the Law, you need to train, to learn more tricks and when you will be ready, you will push Chaos to its place and find the right balance for the Universe.

. Nice and easy indie shmup. There are upgrades to buy and a life system. You have to switch from 3 different colors to hit enemies (like Ikaruga and Radiant Silvergun), there's the 3 primary (Red, Blue and Yellow) plus the secondaries (Purple, Orange and Green) colors, you can hit for exemple hit purples and green gems with the blue shot.

The only downsides are the sounds effects and how long the boss patterns are lasting.. It's a flash game from the early 2000s. Not worth paying for.
